

PROFESSIONAL COMMUNICATION

CURRICULUM

First Offered Fall 2010

Master of Professional Communication

DEGREE REQUIREMENTS		Credits
Master's Research/ Paper		(Milestone)
		(Non-credit)
PC8001	Library Research Colloquium	
PC8002	Prof Comm: Hist, Theory, Prac	1
PC8003	Research Methods	1
PC8004	Internship	1
PC8005	The Virtual Organization	1
PC8006	Visual Communication and Design	1
AND 3 elective credits		3

Electives	Credits	
CD8310	Critical Approaches to Cultural Comm	1
CD8320	Media Languages	1
CD8330	Audiences and the Public	1
PC8101	Adv Speaking, Presentat'n Tech	1
PC8102	Communication and Legal Issues	1
PC8103	Communication and Technology	1
PC8104	Crisis Communication	1
PC8105	Proposals, Grants, Fundraising	1
PC8106	Special Topics: Prof Comm	1
PC8107	Strategic Media Relations	1
PC8108	Visual Rhetoric	1
PC8109	Directed Studies	1

COURSE LISTING

Major Research Paper

The Major Research Paper is a sustained exploration of a specialized topic supported by material from scholarly sources and a theoretical framework. It may take the form of a critical review of literature or an empirical exploration, and may include research conducted during the MPC internship. The MRP is evaluated by a supervisor and second reader and requires a presentation and a knowledge translation product (e.g. a research poster or a digital representation of the project). Pass/Fail

PC8001 Library Research Colloquium

The Library Research Colloquium will introduce students to the complexities of contemporary library research at the graduate level including the quality of information sources, searching strategies, Boolean nesting and hierarchies, the metrology of information transfer, the journal impact factor, citation styles and bibliographic citation managers. Non-credit course. Pass/Fail

PC8002 Professional Communication: History, Theory, Practice

This course examines how diverse practices of professional communication have evolved and merged into a defined discipline supported by a body of interdisciplinary research. Moving from past to present, we will investigate how the recent shift from traditional to digital and from local to global communication practices and processes has transformed the foundations of professional practice including strategic planning, ethics, and interpersonal, organizational and public communication. Looking towards the future within a media ecology framework, we will theorize the ways current and imagined techno-global communication practices may impact sustainability on social, economic, political, ethical, and environmental levels. Throughout the course, we will consider how the shift from mechanistic to systems thinking provides new research methods and theoretical models to study these complex and dynamic processes. 1 Credit

PC8003 Research Methods

Students will be introduced to the theories, methodologies and methods that take into account creative, humanities-based and social scientific perspectives. A second goal of the course will be to familiarize students with the research and information gathering process, with the use of library and library resources, electronic and online research, and creative and unusual research strategies. The third goal is to provide an introduction to the art of project design and the writing of proposals. 1 Credit

PC8004 Internship

The internship allows students to participate in organizational placements that relate to their professional interests and takes place in the second (winter) semester of the MPC program. Students are responsible for identifying potential host institutions and securing their own placements subject to approval by the School of Professional Communication. The internship is approximately 150 hours in duration spread over 8 to 10 weeks. The institutional mentor and the intern establish a mutually agreed upon schedule. Students provide the School with regular journal submissions. The institutional supervisor completes an interim and a final report. 1 Credit. Pass/Fail

PC8005 The Virtual Organization

This course addresses the Internet's increasing impact as a dynamic platform of professional communication practices. Students will examine how a knowledge environment fused with social networking capabilities creates unprecedented opportunities, challenges and risks for the contemporary organization and its members. Drawing on case-grounded theory and hands-on investigation, students will explore the organizational revolution implicit in present and emergent technological innovations and virtual networking trends in order to develop the strategic knowledge and critical practices necessary to communicate in the workplace of today while anticipating the workplace of tomorrow. 1 Credit

PC8006 Visual Communication and Design

This course focuses on the processes, products, and purposes of visual communication and design. Students will learn about the ways design is used to reach a range of audiences and communication objectives. Students will apply visual communication concepts, strategies, and techniques to critique and develop visual design solutions to today's communication problems. Assignments will require that students examine the ways theory and practice intersect and the ways design principles can be used in the planning, production, and evaluation of the visual communication. 1 Credit

PC8101 Advanced Speaking and Presentation Technology

This course builds upon fundamental informative and persuasive speaking techniques by introducing students to their advocacy role as professional communicators. Students learn how to adapt high-level messages for a variety of internal and external audiences and effective audience-response strategies. They will learn the use of presentation technology such as PowerPoint, podcasting, and webcasting to transmit their messages effectively. Theories of self-presentation, presentation protocol, medium and message, and cognitive perception underlie the course. Students will deliver presentations to their peers and have the opportunity to use new media facilities to create and broadcast audio podcasts and videocasts for feedback and evaluation. Spoken voice training to achieve clarity and confidence in oral communications is a part of this course. 1 Credit

PC8102 Communication and Legal Issues

This course introduces students to the legal dimensions of professional communication through a variety of practical and theoretical approaches with a strong emphasis on semiotics, especially semantics and syntactics. Students will study the Canadian legal system as it applies to ethical responsibility and legal risk in the written and oral messages exchanged within and between organizations and will consider the degree to which legal formalism and legal realism operate in the determination of judicial decisions. Using detailed case analyses of documents such as briefs, letters, proposals, contracts, and reports, students will examine legal formats and structures, evidence and argumentation, copyright and intellectual property, and "plain language" writing. Students will learn to identify potential risks, and to prepare and manage communications that are clear, accessible, ethical and legal. 1 Credit

PC8103 Communication and Technology

Communication theorist, Lance Strate, writes that "as environments, media do not determine our actions, but they define the range of possible actions we can take, and facilitate certain actions while discouraging others." Using media ecology, convergence culture and media studies as a broad theoretical framework, students will explore the relationships between past and emergent technologies, as well as the relationships that ensue amongst our current technologies. In particular, we will apply different schools of thought to different contexts of professional communication by examining the ways that this web of medial relationships both enables and hinders our professional communication practices. 1 Credit

PC8104 Crisis Communication

Crises can weaken an organization's reputation, diminish employee commitment, and, as numerous historical examples have shown, destroy companies. Communication professionals must know how to predict, prevent, and manage crises. This course explores the theory and practice of crisis communication in a variety of sectors. Using case studies, students examine and analyze the natures of crises; the roles of employees, the media (traditional and electronic), and the public; theories of crisis management and crisis communication; and the role of the communication professional. The stakeholder dialectic and deliberative rhetoric theories are two frameworks that govern the course's investigation into crisis communication modes. 1 Credit

PC8105 Proposal Writing, Grant Seeking and Fundraising

This course provides a detailed introduction to the multidimensional processes of grant-seeking and the strategic principles of writing proposals for research funding and non-profit fundraising. Through a theoretical framework grounded in classical and modern rhetoric, meta-rhetoric, and narratology, students will explore how professional communicators construct polished arguments to generate support. From the perspective of both grant seekers and multidisciplinary peer-review audiences, students will learn how to identify and target government, foundation, and corporate funding sources/opportunities, to translate project goals and problem statements into clear objectives and hypotheses reflective of societal need, and to coordinate activities in the planning, development, structuring, and articulation of feasible, methodologically rigorous, and conceptually innovative research projects/proposals. Students will also gain practice in applying these techniques to fundraising initiatives and tasks including outreach and the cultivation of potential foundation and corporate donors. 1 Credit

PC8106 Special Topics in Professional Communication

Courses offered on an occasional one-time-only or very limited basis designed to address specific subjects of compelling current interest. Special topics courses will integrate visiting guest lecturers who are experts in the field. 1 Credit

PC8107 Strategic Media Relations

This course examines the theory and practice of effective media relations. Students will explore the geography of the modern media landscape – including both traditional and new media outlets – and learn how to navigate it on behalf of an organization or client. They will study the concepts underlying media relations, and how to employ them in strategic planning, image management, advocacy, and both proactive and reactive interaction with the press. Through a critical analysis of what actually makes a story newsworthy and of how news organizations function, students will learn how to craft and deliver the kind of sharply defined messages that are effective in today's 24/7 news cycle. 1 Credit

PC8108 Visual Rhetoric

Drawing on the field of visual studies, aesthetics, and media history this seminar explores visual meaning-making. It investigates how images dominate or become dominated by the viewer/consumer; how images and written text combine to persuade viewers; and how visual culture intersects with history and technology. 1 Credit

PC8109 Directed Studies

This course is for students who wish to gain knowledge in a specific area for which no graduate level classes are available in the Winter 2016 semester. Students who are approved to take the course are assigned a suitable class advisor most familiar with the proposed content. A program of supervised, advanced study related to the student's area of concentration will be negotiated on an individual basis with the supervising faculty member. 1 Credit
