Project Description

Proposals should describe the research/project in enough detail to allow informed assessment by the 2025 Strategic SRC Initiative Fund Review Committee members. Since not all Committee members will have an intimate knowledge of the subject matter of all proposals, the proposal must avoid jargon and highly technical content.

The project description must include:

Objectives - The specific nature and objectives of the SRC project to be funded.

Context - A brief literature review to situate the proposed project and, as appropriate, its theoretical approach. The context should also include the project's relevance, potential impacts and/or contributions to the respective field of study, including how the proposal aligns with the university's Strategic Research Plan 2025-2030 (SRP).

Methods - The methods to be employed, including, as appropriate, data collection, analysis and data management strategies.

Timeline - The time period within which the work will be undertaken.

Optional - Visual items such as timelines and graphs and imagery may be uploaded to your GAF separately as an Appendix (maximum 2 pages).

Knowledge Mobilization and Anticipated Outcomes

There should be a clear indication of the expected outcome(s) of the proposed SRC project (e.g., publications, presentations, preliminary stage of a large project, community engagement initiatives/outreach, etc.), including any relevant student/HQP training. As appropriate, proposals should indicate how the proposed SRC project is preparing for future externally-funded opportunities.
